tomorrow

Complete solutions for maritime data and communications

Dutch Marine Technology offers decades of experience in communications, connectivity & internet, and passenger & crew entertainment systems. Every environment and client requirement is unique, so we develop tailor-made, flexible solutions that meet your current situation and future needs, at the most attractive rates, without unpleasant billing surprises.

We have built up many years of knowledge and experience in creating solutions specifically tailored to customers' fleet communication, capacity and coverage requirements. Our customization includes design, monitoring and optimization of hardware and WiFi networks to provide top performance and maximum benefit for guests, crew, operations and IoT.

Why Dutch Marine Technology?

- + **Single point of contact**
- + **Full-service system integrator**
- + **Everything from advice to delivery, installation and service**

Wherever you are, and whatever your specific needs, we are happy to help. By matching our products, team and exceptional service with in-depth, up-to-date knowledge of the maritime industry, we find the right solution every time.

Do you have any challenges to discuss? Would you like to find out how we can help you meet the communications and data challenges of today and tomorrow?

The best rates for 4G LTE in Europe... and more!

- + Best pricing thanks to our high purchasing volumes – we pass the savings on to you
- + Premium European provider with own network
- + Backup by a second reliable provider for optimum coverage and uptime
- + Solutions tailored to fleet communication, capacity and coverage needs
- + Customers can easily adjust bundles (upgrade or downgrade)
- + Fleet pooling: it is possible, for example, for five ships in a fleet to share one bundle
- + Short term contracts: for example, we can enter into a contract for just 4 months
- + No out-of-bundle billing surprises
- + Full integration with existing equipment
- + Optional satellite integration, preventing costly data roaming
- + Customization includes design, monitoring and optimization of hardware & WiFi networks
- + Best performance and maximum benefit for guests, crew, operations and IoT
- + Management, monitoring and maintenance support
